Subject: START Mobilized to Houston, Tx (NRC#1152727) - UPDATE

The failed tank contained approximately 78,000 bbl with 50,000 bbl recovered since the incident happened on 07.07.16 @1400 hrs. There are four OSROs and 10 vac trucks currently onsite to address the remaining amount. The facility is within 450 yards of water but all material was kept within the secondary containment and no waterways were impacted. The USCG also responded but was satisfied with the response actions and demobilized. START has also demobilized. The cause of the tank failure is unknown at this time.

Subject: START Mobilized to Houston, Tx (NRC#1152727)

START has been mobilized to follow up on the reported tank failure which released 20-25,000 bbl of IF-380 bunker fuel into secondary containment. At this time, there is no report of release into water and there are four OSROs onsite. The incident happened yesterday but was not reported until today. The facility is near the shoreline and close to Galveston Bay (see attached map). The PDO is in contact with USCG Sector Houston who is also en-route to the facility. OSC McAteer has been notified and ready to respond if needed.
